I am not a lawyer. (c) The author of this article. Download Arcon 80 Hr Pro Free Software [Arcon 80 Hr Pro Free Software] [Written by: Anusha Venkatraman] [Republished by: Sam Gill] [Updated: Sept 25, 2010] Introduction Arcon 80 Hr Pro Free Software is a device that “extends your battery life” by forcing your computer to sleep once the battery runs out, and waking it up once the battery reaches a certain percentage, typically 80%. This is a great device for computer users who either have poor power management features, or who would like to significantly extend the battery life of their laptops. Features and Set Up The software is a lot more advanced than the box suggests. It will sit in the background and monitor all your computer’s activities for you. Arcon 80 Hr Pro Free Software will wake up your computer when it is running in the background. I have it set to wake up at 80%, but the choices are 0, 10, 20, 30, 40, 50, or 60%. You can change the settings through the Preferences menu.

Keyboard/Mouse Detection The software will also detect if you have a keyboard/mouse connected to your computer, and will automatically enable “sleep” mode when it detects that you are not using your mouse or keyboard. This helps to minimize the

amount of power used by your computer. It is disabled by default. Network Activity Monitoring It will also monitor your network activities. If you’re connected to the internet, it will detect what sites you are visiting and try to minimize your usage of them. If you’re connected to a particular chat or news site, it will try to minimize the usage of those connections. You can select specific chat, news, or bookmark sites. Email Notifications You can also set up email notifications. For example, you can send a notification to yourself when you receive an email that you have been marked as “Spam”, or when you receive an email that is larger than a certain size. Battery Usage This utility can also monitor the battery usage of your computer. It will tell 82157476af
